Abstract

This document serves as the official author template for NExAIE. It now supports multiple authors and institutions, following the standards of high-impact journals.

Graphical Abstract

Keywords: AI publishing, education, open access, multi-author template

* Corresponding author: editor@kahveci.pw

1 Introduction

This is where authors introduce the problem and context (Kahveci, 2026a).

2 Methods

Explain methodology clearly.

$$\sigma = \sqrt{\frac{1}{N-1}\sum_{i=1}^{N}(x_i - \bar{x})^2} \tag{1}$$

3 Results

Variable	Value
Data	123

4 Accessibility (WCAG 2.1)

To ensure that NExAIE articles are accessible to all readers, including those using screen readers, we require all authors to follow these WCAG 2.1 standards.

4.1 Implementing Accessible Figures

Use the `\nexaieFigure` command provided by the class. This command wraps the image in an accessibility layer (ActualText metadata).

This is an open access article under the CC BY 4.0 license.

Figure 1: The official NExAIE logo demonstrating the accessible figure command.

4.2 Accessible Tables

Screen readers navigate tables linearly. To maintain accessibility:

- **Avoid Merged Cells**: Avoid using `multirow` or `multicolumn` unless absolutely necessary.
- **Row Headers**: Ensure the first column clearly labels the data that follows in the row.

4.3 Color and Contrast

When creating figures:

- **Non-Color Cues**: Do not use color as the only way to convey meaning. Use patterns, dashed lines, or different marker shapes in plots.
- **Contrast**: Ensure a contrast ratio of at least 4.5:1 for text against its background.

4.4 Descriptive Hyperlinks

Hyperlink text should be descriptive of the destination.

- **Poor**: Click here to see the archive.
- **Good**: For further details, see the PEDAL Archive.

5 Conclusion

Summarize findings and implications.

Declarations

Funding

This work was supported by the Nexus AI Research Grant [Grant No. 2026-001].

Author Contributions

MK: Conceptualization, Methodology, Writing - Original Draft. JD: Software, Data Curation. JS: Supervision, Funding Acquisition. All authors have read and agreed to the published version of the manuscript.

Data Availability Statement

The datasets generated and/or analyzed during the current study are available in the NExAIE repository at [link].

Conflicts of Interest

The authors declare no conflict of interest.

A Supplementary Data

Additional datasets and detailed derivation of the equations can be found in this section.
